Skills

Language: PHP, Javascript, HTML, CSS, Java, Python, C++, SQL

Frameworks: Vue.js, Tailwind CSS, React, Flask, Laravel

Databases & Tools: Firebase, PostgreSQL, MySQL, Git, Docker, Claude

Experience

Robotics Technician

March 2024 – April 2024

- Assembled and tested robotic systems, achieving 95%+ functionality rate during deployment
- Diagnosed and repaired mechanical and electrical faults, reducing equipment downtime by 20%
- Performed calibration and quality assurance checks to ensure precision and reliability

MISO OJT

February 2024 – March 2024

- Assisted in IT support, troubleshooting hardware, software, and network-related issues
- Maintained and updated internal systems, ensuring smooth daily operations
- Provided technical support to staff, reducing downtime and improving productivity
- Documented processes and created basic reports for system monitoring

PHP Developer

May 2022 – August 2022

- Developed and deployed dynamic PHP/MySQL web applications, improving system performance by up to 25% through code optimization
- Engineered backend logic and database queries, reducing page load time and enhancing user experience
- Identified and resolved critical bugs, decreasing system errors by 30% and improving application stability

Projects

LiBorrow

- Developed a library borrowing and returning system for managing student and book records in a more organized and efficient process.
- Integrated Arduino Uno and ESP8266 hardware with Firebase to store and synchronize borrowing data between the device and database.
- Built the system in C++ with embedded hardware components to support book check-in and check-out functionality.

SyncFlow CRM | On-going Development

- Developing an automated CRM system with lead pipeline management, task automation, and analytics dashboards for business workflow tracking.
- Building the frontend with Vue.js and TypeScript and the backend with Laravel and PostgreSQL, with Tailwind CSS for responsive UI design.
- Implementing role-based access control and secure authentication to provide tailored data visibility for different user types.

Education

University Of Cebu – Banilad Campus

Bachelor of Science in Information Technology - Software Engineering

2024 – 2028

Relevant Coursework: Web Development, Database Management, Software Engineering, Systems Analysis and Design, Networking, Object-Oriented Programming
